Designed for vetronic & avionic use (MIL-STD 461E/F, 1275A-D, 704A-F & 810F, DEF STAN 59-41 & 61-5)

Commercial off-the-shelf (COTS) is a term for components which are manufactured commercially, readily available, and are non-development items. This term is most often used in military systems. COTS systems are in contrast to systems that are produced entirely and uniquely for the specific application and therefore offer potentially large cost and time savings.
